GLOBODOX Web Client Installation	2

GLOBODOX Web Client Installation

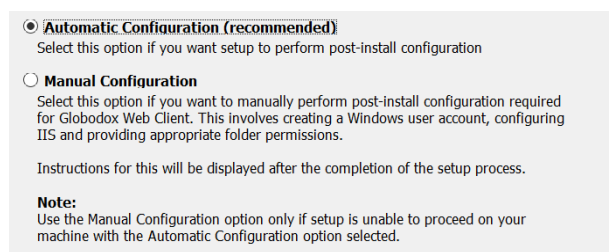

1. Go to <https://www.globodex.com/download/>
2. Click on the '**DOWNLOAD**' button for Web Browser Client.
3. A file named '**gdxwebsetup.exe**' will be downloaded.
4. Click the '**gdxwebsetup.exe**' setup file to run it.
5. '**Installing IIS Feature**' pop-up window will appear. Please wait until the setup initializing is completed. This might take some time.

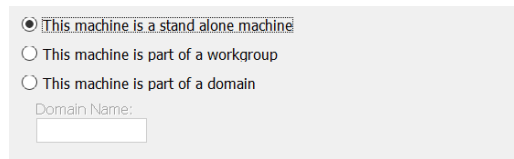

6. The '**GLOBODOX Web Client Setup Wizard**' will be launched. Click Next.

7. Select '**Automatic Configuration**' on the configuration window. Click Next.

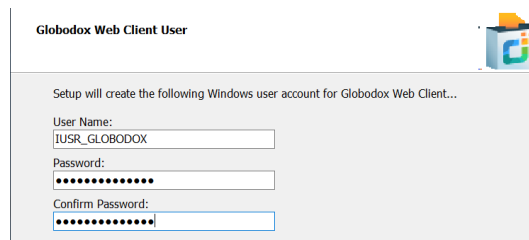

- On the **'Machine Network Status'** window select the option **'This machine is a stand alone machine'** and click Next.

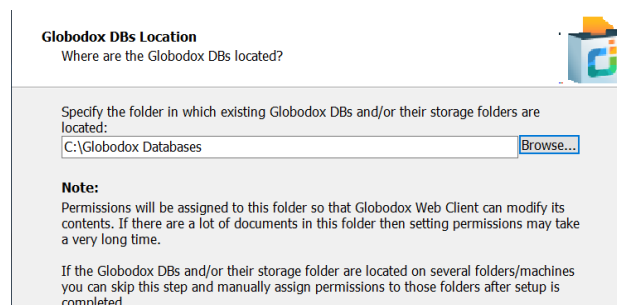

The screenshot shows the 'Machine Network Status' window. It has three radio button options: 'This machine is a stand alone machine' (which is selected), 'This machine is part of a workgroup', and 'This machine is part of a domain'. Below these options is a text field labeled 'Domain Name:'.

- On the **'GLOBODOX Web Client User'**, set the required username and password according to your Windows Password Policy Requirements.

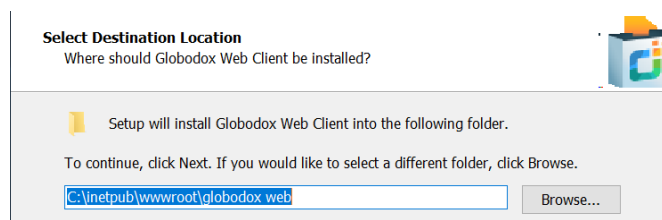

The screenshot shows the 'Globodex Web Client User' window. It states 'Setup will create the following Windows user account for Globodex Web Client...'. There are three input fields: 'User Name:' with the text 'IUSR_GLOBODOX', 'Password:', and 'Confirm Password:'. All password fields are masked with dots.

- On the **'GLOBODOX DBs Location'** window specify the folder in which GLOBODOX DBs are located. (By default it is the **'C:\Globodex Databases'** folder) Click Next.

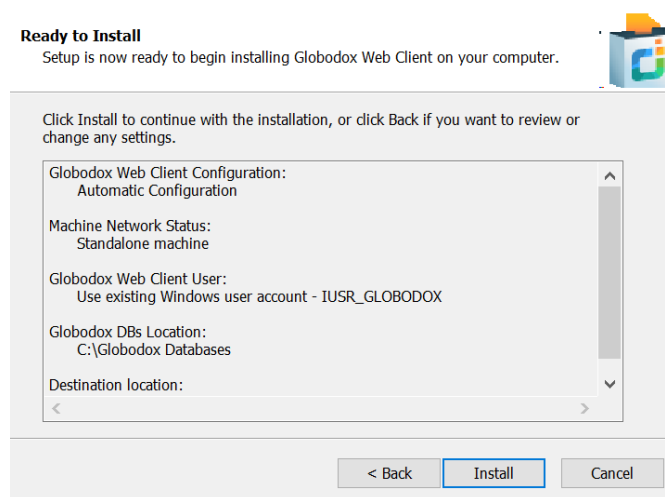

The screenshot shows the 'Globodex DBs Location' window. It asks 'Where are the Globodex DBs located?'. There is a text field with 'C:\Globodex Databases' and a 'Browse...' button. Below this is a 'Note:' section with two paragraphs of text explaining permissions and installation options.

- Click Next on the **'Select Destination Location'** window.

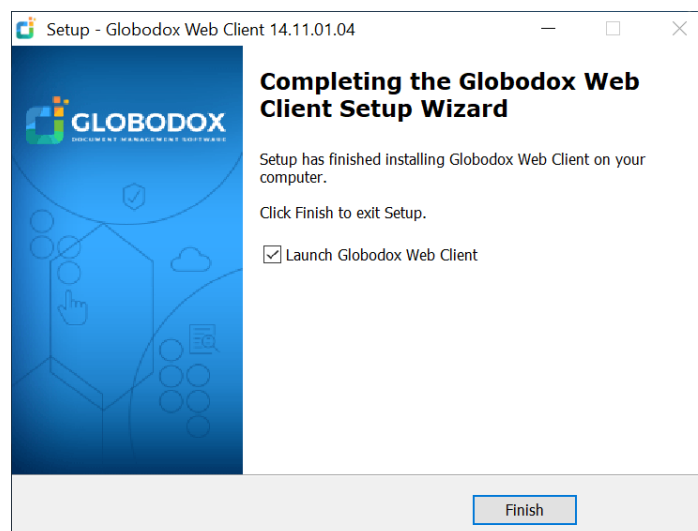

The screenshot shows the 'Select Destination Location' window. It asks 'Where should Globodex Web Client be installed?'. It states 'Setup will install Globodex Web Client into the following folder.' and 'To continue, click Next. If you would like to select a different folder, click Browse.' There is a text field with 'C:\inetpub\wwwroot\globodex web' and a 'Browse...' button.

12. Click on the **'Install'** button to begin the installation.

13. Once the installation is complete click on the finish button.

14. You will be redirected to <http://localhost/globodexweb/>

15. Fill in the username and password and click on login.

16. That's it! GLOBODOX Web Client is configured and is ready to use.
